Overview

TinaGarden is a Wireless Gigabit Router with BitTorrent (BT) download function for SOHO/SME market. It is based on Cortina CS3512 Network Processor with up to 300MHz core frequency. TinaGarden supports 1 GE (Gigabit Ethernet) WAN and 4 GE LAN. With miniPCI slot which allows the latest IEEE 802.11n WLAN access via 802.11n WiFi plugin module, the wireless transmitting rate is enhanced observably; especially, when we lead in PoE/PoE Plus module in this platform. It can support GE POE application and be a much ore attractive and integrated gateway platform with the applications of these two technologies.

TinaGarden provides 2 SATA interfaces and 2 USB 2.0 OTG (On-The-Go) ports, which enable connection up to 4 storage devices including the internal HDD and external USB HDD or USB Flash. Users can easily download the multimedia contents from the website though http, ftp, and bit torrent (BT). Meanwhile, TinaGarden can also be regarded as file/streaming server to provide high capacity data backup and HD home entertainment.

As a mass production ready product, customers can adopt TinaGarden directly as their end product. Furthermore, abundant interfaces will help the customer to extend their own functions without any engineering cost.
